

Dantek LibraryWeb

Dantek LibraryWeb – an extension of Dantek BiblioMatik

Dantek BiblioMatik is known as an effective tool with many benefits for your work in the school library. Dantek LibraryWeb is an extra option offering a web based search module on a Dantek BiblioMatik system.

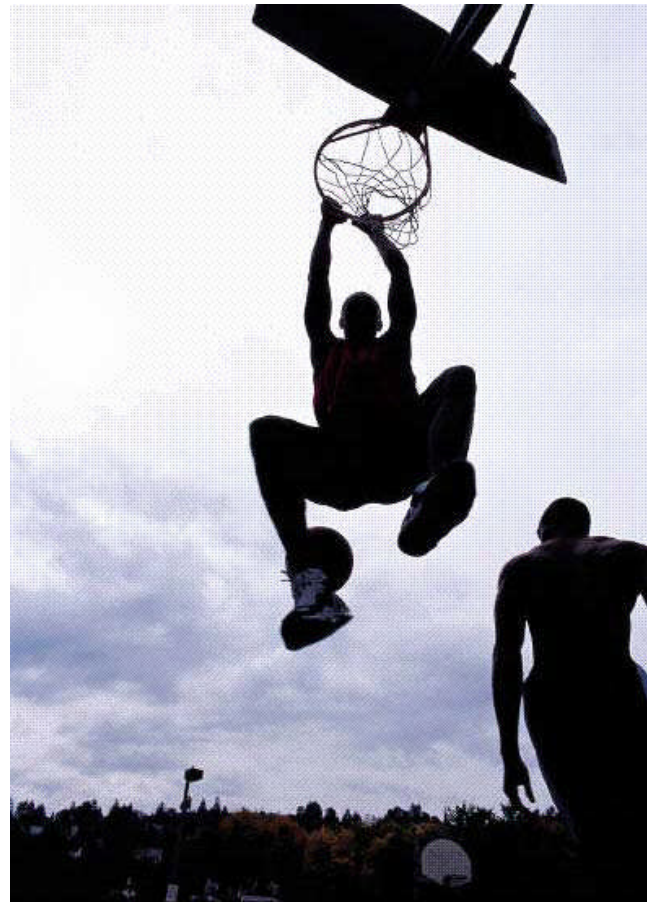

Many school users are familiar with the use of the web or the internet. The advantage of using the internet is that users consider it to be easy to use, where one can choose the next step with just a click of the mouse. Additionally, it is easy to make the user interface more exciting by adding pictures, by accentuating important information with coloured indicators, and because starting with the existing information, you can click your way along via links to completely new and different information. Dantek LibraryWeb fully utilizes the advantages of the web. Students can easily use their experience with the internet to get the benefits and excitement of using such a web system.

How to work with Dantek LibraryWeb

In Dantek LibraryWeb the students can initiate a web search by writing a single word or a phrase and then clicking on “search”. One has the option of selecting whether it is a title, an author or a subject as the search clause.

Advanced search option gives the possibility to define other search criteria with the option of choosing “and”, “or” and “not” operators. At the same time one can bind a search to a certain age group, specific type of material or other criteria.

“Good ideas” guides students through a series of options from different categories and subjects. Students become inspired by what the school library offers. The inspiring way of finding materials introduces the students to a wide range of reading adventures, which they could not have discovered on their own.

Search results

Search results are presented in the form of a summary, in which all of the result data is described by title, author and more in just one line. You can see with colour coding whether the material is available at school library or whether it is possible to reserve it from another school library. As additional information, the type of material is indicated with symbols.

If the title is clicked on, more information about the material is presented, including a description of the content together with all of the relevant data.

(continue next page)

There are numerous opportunities to “explore” through browsing the search result collection of the school library and the generated links relating to these results. In addition, information about the material can be printed out, and the material that is not available can be reserved. The ability for the students to reserve materials is optional and can be made available or ruled out as part of system settings.

which is part of Microsoft server products, without any further money investment.

Client machines should only be able to run Internet Explorer 5.5 or higher.

Prerequisites

There are actually no special prerequisites to install Dantek LibraryWeb. The installation can coexist on the same server that is running Dantek BiblioMatik school library system.

It runs under Microsoft Internet Information Server,

The screenshot shows the Dantek LibraryWeb search interface. At the top left, it says "District schools All libraries". On the right, it shows "Lånerstatus" and "You are not logged in" with a "View reservations" link. Below the header, there are navigation tabs: "Search and find", "Advanced search", "Themes", "Search results", and "Cover". The search bar contains the query "sing a song" and shows "9 records". The "Results per page" is set to "10". There are buttons for "Vis valgte" and "Print". Navigation arrows for "Forrige" and "Næste" are visible, along with "Site 1 of 1".

Select	Number	Title	Classification	Author
<input type="checkbox"/>	1	Sing a song bånd		
<input checked="" type="checkbox"/>	113	Sing a song	78	
<input type="checkbox"/>	7	Sing a song	78	
<input type="checkbox"/>	1	Sing a song; teksthæfte	78	European Language Institute
<input type="checkbox"/>	174	151 andre sange : for folkeskolen, gymnasiet, HF m. m.	78	
<input type="checkbox"/>	1	Sing a song		
<input type="checkbox"/>	109	The English songbook : for 1 stemme med becifring	78	
<input type="checkbox"/>	1	Sing a song		Melser, June
<input type="checkbox"/>	1	Sing a song; lydbånd	78	European Language Institute

On the right side of the interface, details for the selected record (78.611) are shown:
